

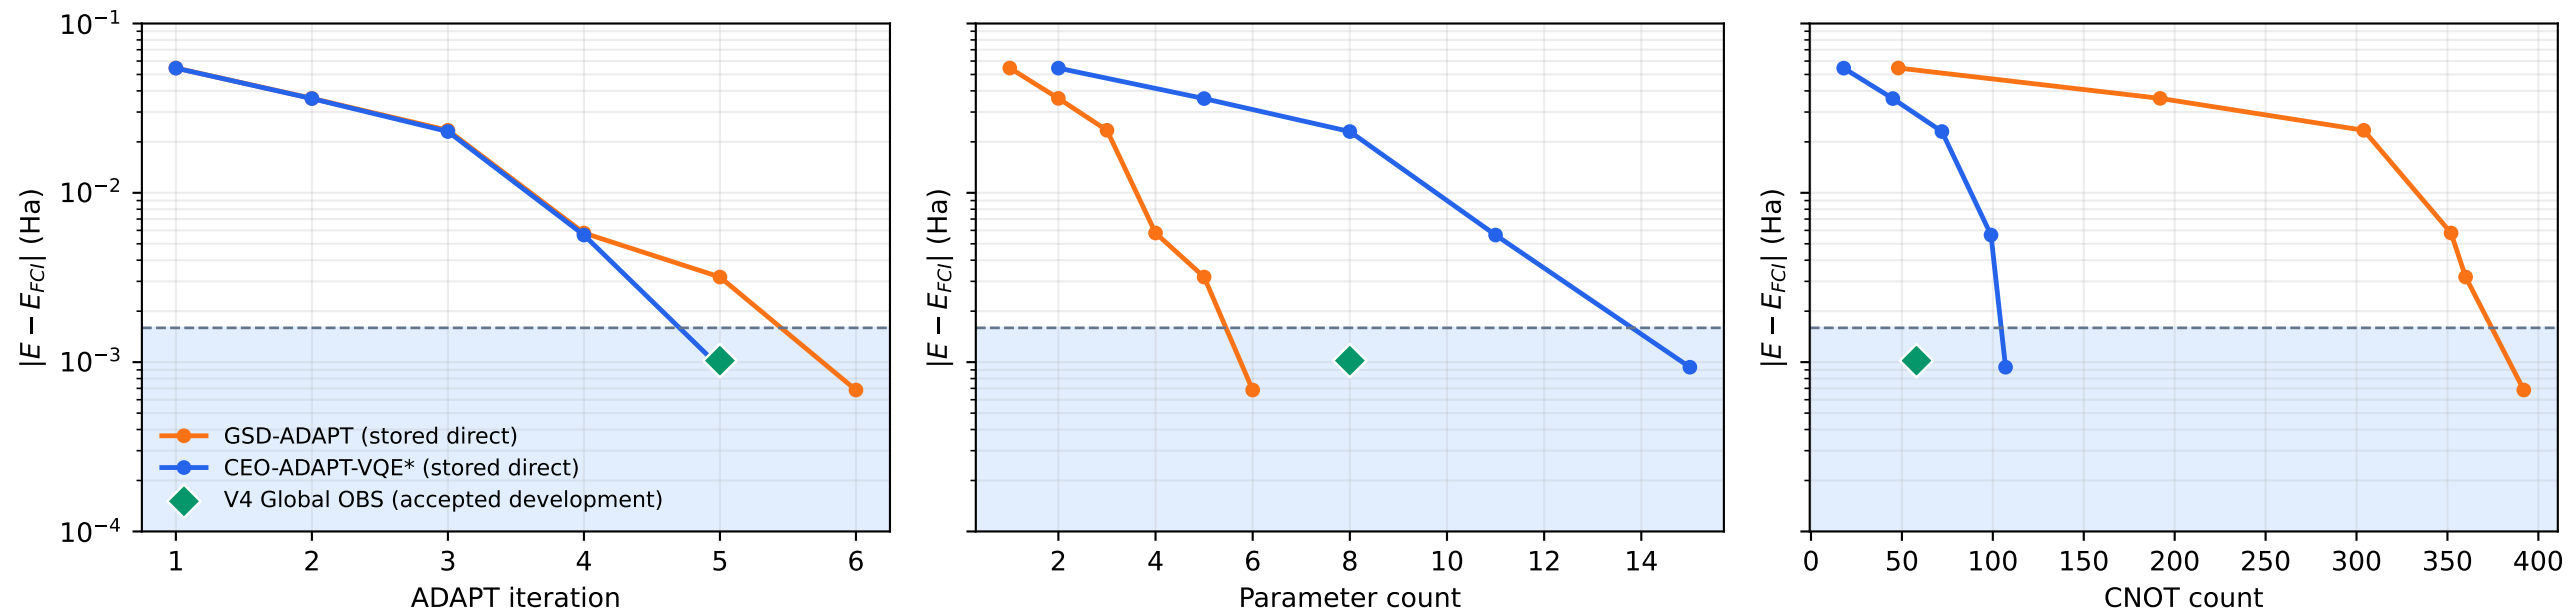

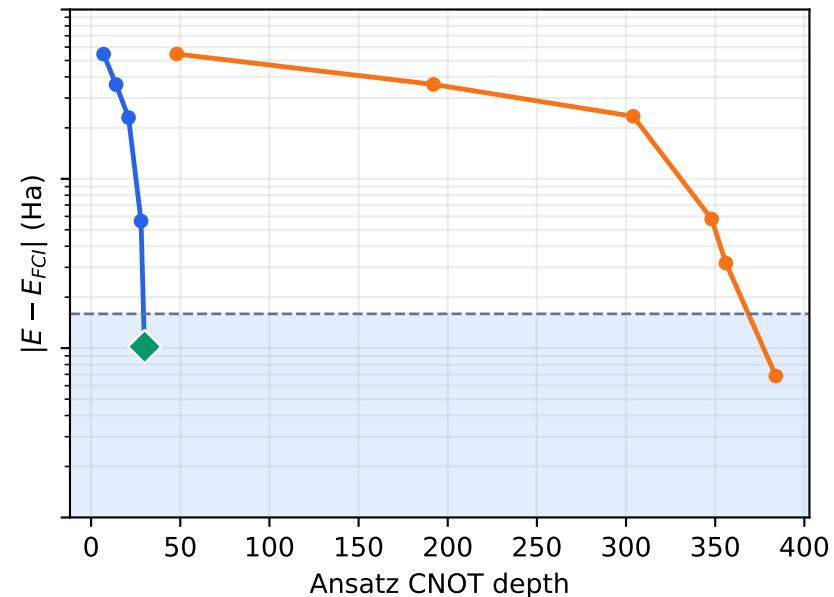

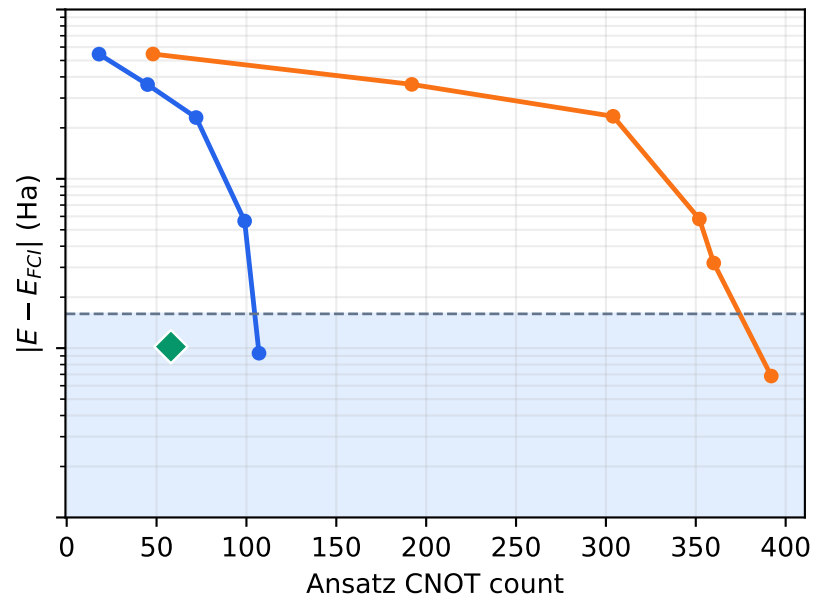

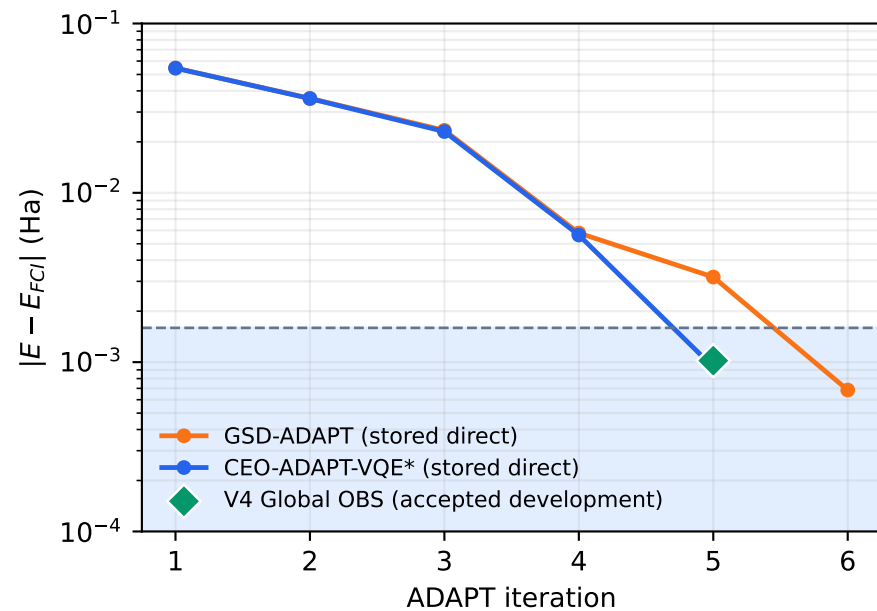

Fig. 11-equivalent - LiH at 3 A (available stored comparators)

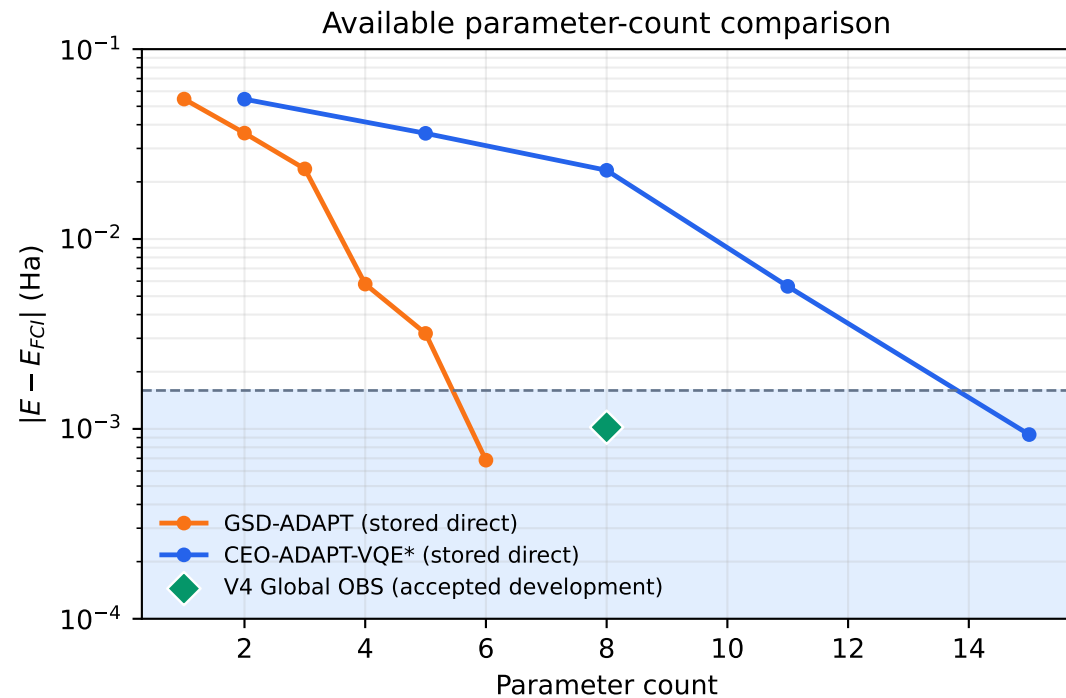

V4 is one compression point from CEO* iteration 5; it is not a new ADAPT trajectory. QEB/qubit trajectories are unavailable.

Fig. 14-equivalent circuit comparison - LiH at 3 A

Exact noiseless simulator; first-chemical-accuracy stored trajectories; V4 shown as accepted development compression.

Fig. 15-equivalent measurement comparison - LiH at 3 A

Measurement-cost claim boundary

Paper-equivalent Measurement Cost trajectory is not available

Paper endpoint references only:

GSD-ADAPT: 50,468

CEO-ADAPT-VQE*: 560

V4: N/A

Implementation counters are not substituted.
